

2023 PNW Winter Canola Variety Trial data including a three-year mean seed yield (lbs. per acre), 2023 seed yield (lbs. per acre), winter survival scores (mean of scores from Moscow, ID, Nezperce, ID, and Davenport, WA; 1 to 9 where 1 indicates no survival and 9 indicates no winter damage) 50% flower date (Moscow, ID; date in May), and plant canopy height at maturity (mean of Moscow, ID and Nezperce, ID; inches).

* The 2023 Davenport site had only three replications, while the other sites had four replications, and the overall means for seed yield reflect the fewer reps at Davenport.

** Resistant to Group 2 herbicides.
